PROFILE

Computer Science student specializing in Data Engineering and Real-Time Data Processing with hands-on experience building ETL pipelines, streaming architectures, cloud-based data lakes, and automated workflows. Skilled in Python, SQL, Apache Kafka, Apache Airflow, AWS S3, and MySQL with experience developing scalable analytics systems, real-time monitoring dashboards, and production-style data engineering projects.

CORE SKILLS

Category	Skills
Languages	Python, SQL, Java, C++, Bash
Data Engineering	ETL Pipelines, Data Warehousing, Data Lakes, Data Cleaning, Aggregation
Streaming & Automation	Apache Kafka, Apache Airflow, Docker Compose
Databases	MySQL, SQL Joins, Window Functions, Query Optimization
Cloud & Analytics	AWS S3, Amazon Athena
Tools	Git, Docker, VS Code
Currently Learning	Apache Spark, AWS Services

EXPERIENCE

Data Science & Analytics Intern — DevelopersHub Corporation (Remote) | Feb 2026 – Mar 2026

- Worked on ML classification models using real-world datasets.
- Performed preprocessing, feature engineering, and model export using Pickle.
- Gained hands-on experience with analytics workflows and data processing.

PROJECTS

Real-Time Cyber Threat Detection Pipeline

Technologies: Python, Apache Kafka, Apache Airflow, MySQL, AWS S3, Amazon Athena, Flask, Docker

- Designed a real-time streaming architecture using Kafka producers/consumers to process simulated web server logs with malicious traffic.
- Built a rule-based threat detection engine for SQL injection, XSS, brute-force, and directory traversal attacks with live alerts.
- Stored structured logs in MySQL and raw JSON logs in AWS S3 partitioned for scalable querying using Amazon Athena.
- Developed a Flask dashboard with live alerts, attack statistics, and time-series visualizations.
- Automated hourly aggregation and monitoring workflows using Apache Airflow DAGs and Docker Compose.
- GitHub: [Complete-real-time-cyber-threat-detection-pipeline](#)

Pakistan Flood Risk Monitoring System

- Built ETL pipelines using Apache Airflow with live weather APIs and MySQL dashboards.
- GitHub: [airflow-flood-early-warning-system](#)

Customer Transactions Data Warehouse

- Designed a mini data warehouse using SQL window functions for analytics.
- GitHub: [Customer-Transactions-Data-Warehouse](#)

Daily Sales Aggregation & Reporting Pipeline

- Automated daily sales reporting using Python and SQL transformations.
- GitHub: [Daily-Sales-Aggregation-Reporting-Pipeline](#)

EDUCATION

BS Computer Science — National Skills University, Islamabad (2023 – 2027)

FSc Pre-Engineering — Punjab College

LANGUAGES

English (Intermediate), Urdu (Native), Punjabi (Native)
